

INSTALLATION GUIDE FOR CLADDING

Important Information

PLEASE READ PRIOR TO INSTALLATION

Before beginning any work, we recommend that you carefully read these instructions and familiarise yourself with all components, available options, and the installation method you intend to use.

The diagrams and instructions provided in this guide are for illustrative purposes only and are not intended to replace the services of a professional installer.

All work carried out using composite products must comply with applicable building regulations.

The consumer assumes all risks and liability associated with the use of this product.

STORAGE & HANDLING

Although composite boards are highly durable, please follow these important guidelines for storing, handling, and working with composite products to preserve their original appearance

HANDLING & STORAGE

- To unload composite safely, ensure there are at least 2 people present and handle them carefully to avoid injuries
- When transporting boards by hand, carry the slats on a tilt for better support
- Do not slide or drag boards across each other to prevent damage to the texture
- Store boards flat, level and off the ground at all times. Use support battens under them at 400mm intervals to prevent sagging
- Cover the composite with a tarpaulin or similar covering to keep them clean from debris until installation

BEFORE YOU INSTALL

STEP 1: SAFETY FIRST

Before you start any construction work:

- Wear appropriate safety clothing and equipment
- Make sure you are fully protected to reduce the risk of injury:

 Safety glasses

 Gloves

 Appropriate PPE

STEP 2: TOOLS YOU WILL NEED

Standard woodworking tools can be used. For best results:

- Use carbide-tipped cutting blades
- Use stainless steel or outdoor-rated screws and fixings

Tools Required

 Jig Saw

 Hand Drill

 Tape Measure

 Set Square

 String Line

 Spirit Level

 Protective Eyewear & PPE

 Pencil

BEFORE YOU INSTALL

STEP 3: PLANNING & PREPARATION

Before beginning installation:

- Plan your layout to achieve the best visual finish
- Check that you have all required components
- Ensure door and window openings are finished with the correct trims

 Planning ahead helps avoid mistakes and delays!

STEP 4: INSTALLATION OVERVIEW

Wall cladding can be installed in several different ways

- This guide outlines commonly used installation methods
- Use the method that best suits your project and structure

 Always follow recommended installation guidelines for best results.
